

2003B067 US
Restriction Reqt. 5/31/06
Response dated June 22, 2006

REMARKS

With regard to the requirement for election and restriction, which is the only point raised in the Official Action mailed on May 31, 2006, Applicants hereby provisionally elect, with traverse, the Group I claims, namely, Claims 1-13, for examination.

However, it is believed that the Group II claims, Claims 14-20, drawn to a hydrocarbon conversion process using the modified catalytic molecular sieve of the Group I claims, are so closely related to the Group I claims that they should remain in the same application in order to preserve unity of invention.

The different classifications of the Group I and II claims have been noted, but it is felt that these classifications are not necessarily conclusive on the question of restriction and election. It is believed that the Examiner is trying to draw too fine a line of distinction and that when all the facts are taken into account, the Group II claims should remain in this application. Furthermore, a search of one Group would necessitate a search for the other, and therefore, it would be efficient to search both groups together.

In any event, to facilitate the prosecution of this case, Applicants elect Group I, Claims 1-13, with traverse and reserve the right to file divisional applications to the non-elected Group II claims.

Restriction Reqt. 5/31/06
Response dated June 22, 2006

It is believed that an action on the merits is in order and such is respectfully requested.

Respectfully submitted,

Date: 6/22/2006
